

Our experts will run your fleet, while you run your business

UPS Freight® Truckload

Do you:

- Have an aging fleet and need the capital to replace it?
- Need well trained professional drivers with low turnover?
- Have concerns about the rising cost of fleet insurance and workers' compensation premiums?
- Have difficulty expanding and contracting your fleet effectively to meet peak demands?
- Devote too much of your time keeping up with the latest DOT, OSHA and engine emissions regulations?

If you answered yes to any of these questions, UPS has a solution for you.

Dedicated Contract Carriage from UPS Freight optimizes performance and frees you from the day-to-day burden of managing a private fleet, allowing you to focus on your core business. We offer exclusive use of on-site management, client-branded equipment, and professional uniformed drivers.

Outsourcing your private fleet operation lets you avoid capital outlays for purchasing and maintaining ever aging delivery assets. UPS can train and manage your drivers, provide the flexibility you need to adjust and maintain your fleet size, and limit the liability exposure inherent in running your own fleet. Whether you deliver across town or across the country, we provide answers to your transportation challenges.

Less capital expenditure. Reduced risk. More flexibility. Increased productivity. Dedicated Contract Carriage from UPS is more than a fresh approach to your current distribution strategy — it's a powerful competitive advantage.

DEDICATED CONTRACT CARRIAGE

UPS Freight can build and manage your own branded fleet.

UPS Dedicated Contract Carriage Provides:

Superior Solution Design and Engineering

UPS has 100 years of operational experience. UPS engineers apply their expertise to your unique environment to create a customized network solution that minimizes asset and resource requirements, while providing the highest level of customer service.

Smooth Implementations

Successful transitions result from a consistent process of rigorous planning and training, experienced implementation teams, and disciplined project management that incorporates the best design with the right equipment and proven technology.

UPS Management and Continuous Improvements

Even with a best-in-class design and implementation, things change. Markets and volumes shift, new customers are added, territories expand and delivery requirements may tighten. You need a partner that knows your business, keeps you on budget and can identify areas for growth and improvement.

Information Technology

We use the appropriate level of innovative, road-tested information technology that best meets your needs. Our technology provides:

- Route planning and optimization
- Dispatch management systems
- Real-time order status / visibility
- Handheld and mobile tracking technologies
- EDI integration with client systems
- Management and performance reporting

Qualified Drivers

Your delivery fleet driver is a reflection on you. With UPS Freight Truckload, you'll know your drivers are professional, experienced, safe and valued. We take the responsibility of making sure your driver pool is fully staffed and certified.

What Our Dedicated Solutions Can Do For You

Control Costs

- Lower capital investment
- Improved safety
- Predictable management and administrative costs
- Reduced liability exposure and improved risk management

Improve Customer Care
